Description

VetLine Veterinary Pneumatic Scaler – 4-Hole, 5800–8000Hz, Blind Head, Kavo/Sonicflex Compatible

The 4-way VetLine scaler is designed specifically for **veterinary dental care**, providing effective and practical support for scaling procedures in dogs, cats, and other companion animals.

Featuring a **universal 4-hole connection**, it integrates easily with standard pneumatic micromotors. Its **blind head** (non-irrigated) design simplifies handling and sterilization while ensuring reliability in clinical use.

Operating at an **ultrasonic frequency of 5800–8000Hz (±5%)**, it offers gentle yet powerful vibrations to safely remove calculus during routine prophylaxis.

The scaler comes with **3 inserts compatible with Kavo® / Sonicflex® systems**, offering versatility and immediate use in a variety of veterinary dental protocols.

Built for durability and compatibility, the **VetLine scaler** is an excellent tool for veterinary professionals seeking a dependable, air-driven solution for dental cleaning.
