

6:1 contra-angle head for Endo SmartPlus/DTE Woodpecker

6:1 contra-angle head for Endo SmartPlus/DTE

Available

SKU: MM18EW.02

Categories: Woodpecker

Description

The **6:1 contra-angle head compatible with Endo Smart Plus by Woodpecker DTE** is a professional replacement part for endodontic motors, designed to provide control, precision and reliability during root canal procedures.

6:1 reduction ratio allows operation at low rotational speeds with high torque, improving the management of endodontic instruments and helping to reduce mechanical stress during use.

Super-mini design with slim neck provides excellent visibility of the operating field and makes it easier to access posterior or hard-to-reach areas. The **360° head rotation** allows flexible positioning, adapting to different dental anatomies and daily clinical requirements.

Manufactured from resistant, professional-quality materials, the head is **fully autoclavable**, ensuring high standards of hygiene and safety in the dental practice.

Compatible with several **Woodpecker / DTE endodontic motors**, the **6:1 contra-angle head compatible with Endo Smart Plus** is a versatile solution for maintenance or replacement of the original head.

A professional choice for clinicians looking for consistent performance, ergonomics and durability in endodontic applications.
