Description

The **Woodpecker DTE 6:1 contra-angle head** for Endo Smart Plus is a **professional replacement head for endodontic motors**, designed to deliver **precision, control and reliable performance** during root canal treatments. The **6:1 gear reduction ratio** provides **low-speed, high-torque output**, supporting smooth and controlled endodontic instrumentation.

Its **super-mini head with a slim neck** improves **visibility and access**, particularly in posterior or hard-to-reach areas. The **360° rotating head** allows flexible positioning to suit different clinical scenarios.

Manufactured from **durable professional-grade materials**, the contra-angle head is **fully autoclavable**, ensuring consistent infection control in dental practices.

The **Woodpecker DTE 6:1 contra-angle head with 3 pin / 4 tooth connection** is **compatible with Endo Smart Plus DTE/Woodpecker endodontic motors** and is intended for professional endodontic applications.

An appropriate choice for dental professionals seeking **accuracy, ergonomic design and dependable performance**.
