

VAX suction system, 1 dental unit, semi-wet loop, with control unit

Dental suction unit VAX, 300-450W 230V, 1 dental unit, wet loop, control unit

Available

SKU: DEJ300

Categories: Semi-Wet Ring Systems

Description

The **semi-wet ring suction system 1 dental unit** by VAX delivers stable, reliable performance for daily clinical workflows. Its **semi-wet circuit** optimises fluid management, supporting a safe and hygienic operatory.

Consistent efficiency and reliability.

The system maintains steady suction during extended use, helping control aerosols, fluids and debris for a cleaner, safer working field.

Engineered for continuous operation.

Mechanical design ensures smooth, low-vibration and quiet running, sustaining long procedures with stable performance and minimal disruption.

Easy installation and low maintenance.

A compact footprint enables straightforward placement in tight technical spaces. Direct component access streamlines routine cleaning and scheduled maintenance.

Technical features Suction system 1 dental unit semi-wet loop:

Type	semi-wet
Dental units served	1 at 100%
Control unit	yes
Own cabinet	lower

Water drain	continuous drain
Noise level (db)	?60
Amalgam recovery	optional
Power (Watt)	450
Vacuum (mBar)	120
Flow rate (l/min)	300
Power supply (Volt/Hz)	AC230/50
Weight (Kg)	22
Dimensions (lpxh)mm	370 x 310 x 580
Warranty (months)	24
Certification	CE MDR
