

VAX suction system, 1-4 dental units, wet loop, with smart control

Dental suction unit VAX, 1200 1450W 230V, 1 to 4 dental units, wet loop, smart control technology.

Available

SKU: DEJ1200IN

Categories: Wet Ring Systems

Description

The **VAX wet ring suction system for 4 dental units with control unit** delivers consistent and reliable performance for modern dental clinics.

As with leading wet ring systems from top manufacturers, the **wet ring principle** ensures continuous suction and stable operation, maintaining hygiene and efficiency in every procedure.

Efficiency and steady performance.

The wet ring technology provides constant suction power during prolonged use, improving fluid control and creating a clean, safe clinical environment.

Compact design and easy maintenance.

Built with durable materials and precision components, the system is designed for **easy installation and reduced maintenance**, ensuring lasting reliability.

Professional reliability.

The VAX unit supports two dental chairs with **steady, efficient operation and controlled acoustic comfort**.

Technical features VAX wet ring suction system 4 dental units:

Type	water-ring
Dental units served	1/4
