

# VAX suction system, 1-6 dental units, wet loop, with smart control

Dental suction unit VAX, 1800W 230V, 1 to 6 dental units, wet loop, smart control technology

#### **Available**

SKU: DEJ1800IN

Categories: Wet Ring Systems

## **Description**

The VAX wet ring suction system for 6 dental units with control unit delivers consistent and reliable performance for modern dental clinics.

As with leading wet ring systems from top manufacturers, the **wet ring principle** ensures continuous suction and stable operation, maintaining hygiene and efficiency in every procedure.

### Efficiency and steady performance.

The wet ring technology provides constant suction power during prolonged use, improving fluid control and creating a clean, safe clinical environment.

#### Compact design and easy maintenance.

Built with durable materials and precision components, the system is designed for **easy installation and reduced maintenance**, ensuring lasting reliability.

#### Professional reliability.

The VAX unit supports two dental chairs with **steady**, **efficient operation and controlled acoustic comfort**.
