

## VAX suction system, 1-2 dental units, wet loop, with control unit

Dental suction unit VAX, 600-800W 230V, 1 to 2 dental units, wet loop, control unit.

**Available from 19/01/2026**

**SKU:** DEJ600

**Categories:** Wet Ring Systems

### Description

The **VAX wet ring suction system for 2 dental units with control unit** delivers consistent and reliable performance for modern dental clinics. The **wet ring principle** ensures continuous suction and stable operation, maintaining hygiene and efficiency in every procedure.

#### Efficiency and steady performance.

The wet ring technology provides constant suction power during prolonged use, improving fluid control and creating a clean, safe clinical environment.

#### Compact design and easy maintenance.

Built with durable materials and precision components, the system is designed for **easy installation and reduced maintenance**, ensuring lasting reliability.

#### Professional reliability.

The VAX unit supports two dental chairs with **steady, efficient operation and controlled acoustic comfort**.

#### Technical features VAX suction system 2 dental units:

Type	water-ring
Dental units served	2
Control unit	yes
Own cabinet	lower

Water drain	centrifugal
Noise level (db)	?57
Amalgam recovery	optional
Power (Watt)	800
