

VAX suction system, 1-2 dental units, wet loop, with control unit

Dental suction unit VAX, 600-800W 230V, 1 to 2 dental units, wet loop, control unit.

Available

SKU: DEJ600

Categories: Wet Ring Systems

Description

The **VAX wet ring suction system for 2 dental units with control unit** delivers consistent and reliable performance for modern dental clinics. The **wet ring principle** ensures continuous suction and stable operation, maintaining hygiene and efficiency in every procedure.

Efficiency and steady performance.

The wet ring technology provides constant suction power during prolonged use, improving fluid control and creating a clean, safe clinical environment.

Compact design and easy maintenance.

Built with durable materials and precision components, the system is designed for **easy installation and reduced maintenance**, ensuring lasting reliability.

Professional reliability.

The VAX unit supports two dental chairs with **steady, efficient operation and controlled acoustic comfort**.

Technical features VAX suction system 2 dental units:
