Description

VetLine 1:1 Contra-Angle Handpiece – Direct Ratio, External Spray, E-Type Connection

The **VetLine 1:1 contra-angle handpiece** is a sturdy, reliable instrument designed for micromotors with **external spray systems**. Featuring a **direct 1:1 gear ratio**, it operates smoothly at speeds of up to **20,000rpm**, making it ideal for general dental procedures.

Equipped with a **lever chuck system**, it ensures quick and secure bur changes, improving workflow efficiency. The standard **E-Type connection** provides broad compatibility with most electric and air micromotors on the market.

This model features a **blind head** (no internal spray), making it suitable for procedures that do not require integrated irrigation. The **blue color ring** indicates the 1:1 ratio according to ISO classification.

Compact, well-balanced, and built to last, the VetLine 1:1 is an excellent choice for routine tasks such as oral hygiene, conservative preparations, and general dental use.
