Categories: Equipment Carts

Description

Easy Tray white surgical equipment trolley is the best solution for host you medical instruments in a orderly manner.

Versatile and modular: Made entirely of electro galvanized white enamelled sheet, this cart is modular and configurable with different accessories according to your needs.

No cable in your way: you'll get a cleaner, more sterile environment thanks to hidden electrical connections and a concealed power supply.

One cart for all your equipment: 5 sterilizable and removable trays for host complementary surgical equipment such as scalers, electrosurgery units, piezoelectric surgical devices, implant micromotors, endodontic micromotors, lasers, surgical Stryker equipment, whitening devices, multi-parameter monitors. A single, integrated, height-adjustable infusion set stand can hold up to three bags of saline solution to ensure easy operation.

Fields of use: suitable for medical, surgical and dental environments, ensuring organised and safe management of clinical equipment.

Technical feature Easy Tray white surgical equipment trolley:

- 5 stainless steel tray removable and sterilizable;
- Centralized power system for equipment.
