Categories: Professional Equipment, Satelec - DTE - NSK

Description

Conservative scaler tip PG110.

Detartrasis, or the removal of tartar deposits and supragingival, subgingival and interdental stains, is one of the most common operations performed by all dentists and dental hygienists.

Tecnomed Italia inserts are made from extremely resistant materials and are ideal for use at the high power levels necessary to remove stubborn tartar effectively.

Tips designed for subgingival uses are smaller in size and produce smaller oscillations.

This facilitates work in anatomically inaccessible areas and helps ensure the patient's comfort.

Spray is perfectly tangential to the tip to ensure effective cooling of the operating area.

Spherical diamond disc conservative drill for preparing occlusal surfaces.

Compatibility conservative scaler tip PG110:

- Satelec EX1;
- DTE SBD1;
- NSK G62D.
