Categories: Control Boxes

Description

AIR TWO Control Unit for 4-Holes Midwest Turbine.

Benchtop controls are best for accurate adjustment of air pressure, turbine speed and spray rate (with spray type handpieces). Speed is best controlled by means of a progressive action foot control. Our benchtop control units are designed to work with all types of high speed handpiece currently on the market.

Air Two is a control unit for high speed handpieces with an integrated spray system, complete with a 250 ml solution tank, filter, spray on/ off selector and foot control. Air Two also incorporates controls for adjusting air and spray pressure.

Technical features AIR TWO Control Unit for 4-Holes Midwest Turbine.
