Shipping expected in approximately 60 days

SKU: UV4VA
Categories: Veterinary dental carts

Description

The **Dentalcase portable veterinary dental unit** is designed to provide a compact, self-contained and easy-to-transport workstation for veterinary dentistry procedures, keeping instruments organised and easy to manage.

Its **trolley-style case** makes it easy to move the unit where needed, helping optimise operating space and reduce clutter during clinical activity. Dentalcase is ideal for veterinary practices, clinics and professionals in veterinary dentistry who need a mobile dental workstation that can be easily transported between different operating environments.

The **built-in oil-free compressor**, water spray tank and air-driven suction system make Dentalcase a practical and independent solution, especially for professionals who work in multiple locations or need a ready-to-use dental unit.

The controls are simple and intuitive, operated by hand and foot. The front control panel includes water-spray regulators and instrument selectors, allowing the operator to manage the main functions in an organised and practical way.

The unit is equipped with a **DCI style syringe and 2 instrument hoses** for compatible pneumatic instruments. The **progressive disc foot pedal** allows the operator to adjust instrument speed according to the pressure applied, providing greater control during procedures.

The **air-driven suction system**, combined with a bacteriological filter, supports safer and more functional suction management during treatment. Dentalcase is a professional solution for veterinarians looking for portability, autonomy and practicality in veterinary dentistry.

TECHNICAL FEATURES

Power supply: 220/240 V – 50/60 Hz
Dimensions W x H x D: 600 x 410 x 290 mm
Weight: 30 kg
