

Demineralizer, double

Double demineralizer DTPO2N system, compact size, designed to be directly connected to auto-load autoclaves.

Available on request

SKU: DTP02N
Categories: Demineralizers

Description

The **Double Demineralizer System DTP02N** is an extremely compact universal device designed to remove all salts from water using special ion-exchange resins. It provides a continuous supply of pure water and is designed to be directly connected to automatic-load autoclaves.

When combined with the DS55 dispensing gun, it is the ideal optional accessory for rinsing instruments or filling manual-load autoclaves. The system is conveniently installed inside the sink cabinet, saving space and ensuring easy integration.

Tecnomed Italia universal demineralizers effectively remove dissolved salts from tap water. The ion-exchange resin columns retain the salts and deliver high-quality demineralized water.

The output water quality ranges from 0.1 ?S to 30 ?S, depending on the concentration of salts in the incoming water. This performance fully complies with EN13060 standards regarding water purity requirements for small sterilizers and beyond.

- 2 cartridge containers
- 2 empty cartridges
- 1 flow regulator
- 1 key
- 1 bracket
- 1 bucket containing resin (1,2 lt.)

Technical features double demineralizer DTPO2N system

Article Code	DTP02N

Flow	48 l/h
Initial water purity	0.1 ?S
Max. water temperature	30°C
Internal cartridge size (d x h) mm	72,5 x 250
Total footprint (l x w x h) mm	270 x 145 x 335
Net weight	2,5 Kg
Assembly time	30 minutes
Power	230/12 vac
Warranty	24 months
