Shipping expected in approximately 30 days

SKU: AP293UT
Categories: Intraoral Cameras

Description

The Tecnomed Italia **Double Touch USB intraoral camera** provides Full HD 1080p imaging at 30 fps for intraoral examination and clinical documentation. It connects to the PC via USB 2.0 and includes **software** for capturing and organising patient images.

Front and rear image capture buttons

Capture buttons on the front and rear of the handpiece make it easier to take images of the upper and lower arches. The handpiece weighs 50 g and has a 2.5 m cable.

Autofocus and adjustable COB LED illumination

Autofocus operates from 3 to 60 mm, while COB LED illumination can be adjusted to suit the working conditions. Show patients what you see and keep a visual record of changes between appointments.

Software included for clinical documentation

With the included Windows software, you can view live video, capture still images and save video recordings to the patient gallery. Keep photos, videos and annotations together in each patient’s record, and export or synchronise the archive as needed.
