Categories: Endodontic micromotor

Description

Endo Smart Plus DTE, wireless endodontic micromotor – Woodpecker.

Endo Smart Plus is mainly used in Endodontic treatment. It is a cordless endo motor which can be connected to the matched Apex locator to add an apex locator function. It can be used as a endo motor for preparation and enlargement of root canals. By connecting the endo motor to the matched Apex locator, the position of the file tip inside the canal can be monitored during the procedure and automatic functions such as Apical Slow Down can be activated.

Advantages

- Autoapical Reverse Stop
- Low Noise and Less Vibrations in Handpiece
- 6:1 Super mini Contra angle allows clearer operation field
- Built-in over 30 mainstream file system
- 360 degree rotatable contra-angle

FEATURES Endo Smart Plus DTE:-

- High perform brushless motor
- 6:1 Super mini contra-angle
- Adjustable reciprocating angle
- Super high torque
- Smooth rotations
- Less noise with low vibrations
- Wireless charging
- Combined length determination mode
