

Endo tip for scaler, compatible Satelec SO4, DTE ED3, NSK E6

Endo tip for lateral thermal condensation of gutta-percha. Satelec SO4, DTE ED3, NSK E6 compatible

Available

SKU: PG108

Categories: Satelec - DTE - NSK

Description

Endodontic tip for ultrasonic scaler, compatible with Satelec SO4, DTE ED3 and NSK E6.

Endodontic ultrasonic inserts are an ideal complement to rotary instruments for the treatment of the root canal system. Their **extremely slim profile** respects the natural canal anatomy, facilitating safe access to the pulp chamber, removal of filling materials, and effective preparation and irrigation of the canal space.

The **flexible yet durable files** adapt to different canal morphologies, significantly reducing the risk of canal aberrations. This makes them particularly suitable for shaping, cleaning and disinfecting the internal structure of the tooth with precision and control.

This endodontic tip is specifically designed for **lateral thermal condensation of gutta-percha**, supporting predictable and controlled obturation procedures.

Compatibility **Endodontic tip for ultrasonic scaler: Satelec SO4, DTE ED3, NSK E6.**
