Categories: Outlet

Description

Fi-E Woodpecker — Cordless Gutta-Percha Obturation System – NEW DISPLAY PRODUCT, only 3 pieces availables.

The Fi-E Woodpecker is an electronically controlled, cordless gutta-percha obturation pen for backfilling root canals with thermoplasticised gutta-percha. Its dual-button handpiece offers three injection speeds (slow, medium and fast), delivering a smooth, controlled flow for dense, three-dimensional obturation with no material residue or waste.

Benefits

- **Precise temperature control:** rapid heat-up for fast, safe chairside use.
- **Five working temperatures:** 100°C, 120°C, 150°C, 180°C and 200°C, to suit every type of gutta-percha on the market.
- **Bendable injection needle:** enables precise, complete canal filling, with a 360° rotatable tip for easy access from any angle.
- **High-capacity battery:** up to 4 hours of use — around 1,500 treatments on a single full charge.
- **Ambidextrous dual display:** clear read-out for both left- and right-handed clinicians.

Technical specifications

- Handpiece weight: 148 g
- Battery capacity: 2,000 mAh
- Base weight: 179 g
- Charging time: 2.5 hours
- Battery life: 1,500 operations (one operation = 5 seconds)
- Preset temperatures: 100°C, 120°C, 150°C, 180°C and 200°C
- Heat-up time: within 15 seconds

In the box

- Fi-E handpiece with charging base and transformer
- 4 injection needles: 23G 24 mm, 23G 28 mm, 25G 28 mm
- 2 thermal protector caps
- Injection needle key

The Fi-E Woodpecker obturation system is an advanced solution for optimising endodontic procedures, combining accuracy and clinical efficiency in everyday practice.
