Description

The **stainless-steel medical wall cabinet for disposable products 1000x380x480 H** is designed for **clinics, dental surgeries and laboratories** that demand **hygiene, organisation and reliability**. Made entirely of **medical-grade stainless steel**, it ensures **durability, corrosion resistance and easy cleaning**, ideal for clinical environments.

Specifically created for storing **disposable products** such as gloves, paper or masks, it keeps consumables protected from dust and contamination while maintaining them always within reach.

The **sliding smoked-glass doors** offer a refined appearance and protect the interior from external exposure, combining aesthetics and practicality.

Inside, a **central glass shelf** allows efficient organisation of materials, while the **integrated blue LED lighting** provides soft, uniform illumination that enhances the perception of cleanliness and calm. Its **wall-mounted design** and compact dimensions (**1000x380x480 H mm**) help optimise available space, making it ideal for **clinical, laboratory and medical areas**.

Combining functionality, hygiene and a clean aesthetic, this **stainless-steel medical wall cabinet for disposable products** is an essential component in any professional healthcare workspace.
