

E10D Endo tip for scaler, SATELEC, DTE, NSK compatible

E10D Endo tip for scaler, diamond coated, used for efficient apical polishing of anterior teeth, SATELEC, DTE, NSK compatible, autoclavable 134°C

Available

SKU: PG124

Categories: Professional Equipment, Satelec - DTE - NSK

Description

Endo insert E10D for scaler compatible with Satelec, DTE, NSK, designed for heating gutta-percha in warm lateral condensation techniques, ensuring efficiency and precision in every endodontic procedure.

Made from high-quality materials, this endodontic tip guarantees durability and reliability over time, delivering consistent performance even after repeated use.

Fully compatible with Satelec, DTE and NSK scalers, it easily integrates into the dental workflow, offering versatility across different clinical applications.

The endo insert E10D is autoclavable up to 134°C, ensuring maximum safety and hygiene throughout sterilisation cycles. A practical and essential choice for professionals seeking precision and reliability.
