Description

Ivory angle head 2:1 KaVo and MK-dent compatible.

The small size of the Ivory heads fitted to Silk Line prophylactic and endodontic contra-angles ensures easy access to preparation sites at the rear of all quadrants. Ivory heads are compatible with all Ivory and Kavo® contra-angles.

Thanks to the Rotostop locking system, heads can be removed and changed quickly and easily on all prophylactic line instruments to give the desired reduction ratio.

This high level of versatility permits quick and effective maintenance and lets you replace a damaged head with a new one without having to interrupt an operation if the need occurs. The front bearing features an integrated reinforcement bushing to absorb stress during strenuous operations and guarantee the concentricity of the rotor at all times.

Technical features Ivory angle head 2:1 KaVo and MK-dent compatible:

Indications	Standard
Ratio	2:1
Locking mechanism	Button
Head diameter (mm)	9,5
Head height (mm)	11,6
