

Ivory coupling for KaVo turbines, blind, with spray adjustment

Ivory Silk Line coupling for Kavo® Multiflex® dental turbines, 4-way, spray adjustment, blind

Available

SKU: C31K

Categories: High-speed handpieces Couplings

Description

The **Ivory Silk Line coupling for Kavo Multiflex dental turbines**, blind 4-hole with spray control, is the perfect companion for your dental turbine. Designed for smooth performance and optimal handling, it is the ideal complement to the **Silk Line turbine range**.

Featuring **360° rotation**, **adjustable spray control** and an **ultra-lightweight body of just 29 g**, it allows effortless manoeuvrability and superior ergonomics during daily use. The quick-connect system ensures a secure, stable fit with consistent performance.

The coupling can be selected to **match the turbine connection already in use**, remaining compatible with most turbine couplings on the market. This guarantees full interchangeability and helps to **reduce equipment costs** while maintaining operational efficiency.

The **Ivory Silk Line C31K coupling for Kavo® Multiflex® turbines** provides full rotational freedom, reliable connection and excellent spray delivery — enhancing overall turbine performance.
