

Kit HW-3H Woodpecker scaler handpiece+3 PG031 tips +3 TW1L torque wrench

The **HW-3H Woodpecker ultrasonic handpiece kit** is compatible with EMS® systems and includes an autoclavable handpiece, scaling inserts and torque wrenches for scaling procedures.

Available

SKU: OFM16A

Categories: Scaler Handpieces

Description

The **HW-3H Woodpecker ultrasonic scaler handpiece kit** is designed for use with EMS®-compatible piezoelectric scalers, ensuring full compatibility with commonly used dental inserts.

The **HW-3H handpiece** features a lightweight, ergonomic design that provides a stable grip and precise control during clinical procedures, helping to reduce operator fatigue.

The ultrasonic transducer operates at a frequency of 28KHz \pm 3KHz, delivering effective vibration for calculus removal and oral hygiene procedures.

The **HW-3H handpiece** is designed to withstand high temperatures and pressure and is fully autoclavable without risk of deformation or material degradation.

Compatible with EMS® inserts, the **HW-3H handpiece** is suitable for scaling and prophylaxis treatments.

The HW-3H Woodpecker ultrasonic handpiece kit includes

- 1 ultrasonic scaler handpiece
- 3 scaling inserts for supragingival calculus removal
- 3 torque wrenches

HW-3H handpiece features

- EMS® insert compatibility
- Operating frequency 28KHz \pm 3KHz
- Lightweight and ergonomic design
- High resistance to temperature and pressure
- Fully autoclavable
