

Kit HD-7H DTE-Woodpecker scaler handpiece+3 PG079 tips + 3 TW1L wrench

The HD-7H DTE-Woodpecker ultrasonic scaler handpiece kit is compatible with **Satelec® / NSK / DTE** systems and includes an autoclavable handpiece, scaling tips and torque wrenches for ultrasonic scaling procedures.

Available on request

SKU: OFM17S

Categories: Scaler Handpieces

Description

Designed for use with piezoelectric scaler units compatible with **Satelec® / DTE** systems, the **HD-7H DTE-Woodpecker ultrasonic scaler handpiece kit** ensures compatibility with both the connection system and the inserts used with this standard.

Featuring a lightweight and ergonomic design, the **HD-7H handpiece** is intended to provide a stable grip and precise control during clinical procedures, while improving handling during routine use.

The ultrasonic transducer operates at a frequency of **28KHz \pm 3KHz**, generating effective vibration for calculus removal and oral hygiene procedures.

Built to withstand high temperatures and pressure, the **HD-7H handpiece** is fully autoclavable and suitable for repeated sterilisation cycles.

Compatible with **Satelec® / DTE** systems, the **HD-7H** is intended for scaling and prophylaxis procedures.

The HD-7H DTE-Woodpecker ultrasonic scaler handpiece kit includes

- 1 ultrasonic scaler handpiece
- 3 scaling tips for supragingival calculus removal
- 3 torque wrenches

HD-7H handpiece features

- Compatible with **Satelec® / DTE** systems
- Operating frequency: **28KHz \pm 3KHz**
- Lightweight and ergonomic design
- High resistance to temperature and pressure
- Fully autoclavable
- Compact construction for clinical use
