Description

The **HW-8L LED Woodpecker handpiece for piezoelectric scaler** is designed to provide reliability and comfort in everyday dental procedures. Built from high-quality materials, it is an essential accessory for practices that value precision and consistent performance.

This handpiece is fully autoclavable and highly resistant to high temperatures and pressures, with no risk of cracks or deformations. These features ensure long-lasting safety and durability.

Its lightweight and ergonomic design allows for comfortable handling, reducing operator fatigue during extended sessions. The integrated LED light enhances visibility in the working area, improving accuracy and control.

The HW-8L LED Woodpecker handpiece for piezoelectric scaler is compatible with the D600 LED DTE-Woodpecker, making it a versatile and dependable solution for safe and efficient daily use.
