Available on request

SKU: 40050501

Categories: Water decontaminators

Description

The Biofilm Remover BR by Metasys is expertly designed to eliminate biofilm from the tubing of your dental unit, ensuring a safer and more hygienic environment for your patients. This innovative device is essential for maintaining optimal hygiene and protecting your dental equipment.

The Biofilm Remover BR is engineered to remove existing biofilm from water lines before installing a water decontamination system, such as WEK or WEK Light. Biofilm is a primary source of contamination and unpleasant odors in dental unit water and can damage instruments like handpieces and contra-angles. Used with the GREEN&CLEAN BR preparation, the BR device effectively eliminates biofilm in just 30 minutes, preventing future buildup.

Strengths and Features:

- **Effective Biofilm Removal:** The GREEN&CLEAN BR solution, with 4% hydrogen peroxide, breaks the hydrogen bonds in biofilm, allowing its oxidation and thorough removal.
- **Ease of Use:** The device is simple to connect and operate, with the cleaning solution automatically pumped into the dental treatment unit.
- **Rapid Exposure Time:** The process takes between 30 minutes to 1 hour, making it a quick and efficient solution.

Technical Specifications:

- GREEN&CLEAN BR solution with 4% hydrogen peroxide.
- Biofilm removal in approximately 30 minutes.
- Easy to connect and use.
- Compatible with WEK and WEK Light decontamination systems.

Choose the Biofilm Remover BR by Metasys from Tecnomed Italia and discover a new level of efficiency and reliability in water decontamination systems for dental practices.
