

Metasys ECO II plus amalgam separator, up to 5 dental unit

Available

SKU: 101000024

Categories: Amalgam Separators

Description

The Metasys ECO II PLUS Amalgam Separator 5 dental units is designed to provide efficient and hassle-free amalgam management, servicing up to five dental units with a fully electronic-free system that ensures seamless operation in a busy dental environment.

This device stands out for its ease of installation and operation, eliminating the need for controls, sensors, or electronic boards, making it an ideal choice for clinics seeking a straightforward, cost-effective solution. Despite its simplicity, the ECO II PLUS offers superior performance with an amalgam separation rate of over 99%, making it a reliable choice for dental clinics that prioritize both compliance and operational efficiency. The container must be replaced annually to maintain optimal performance, in accordance with strict ISO standards

Key Features and Benefits:

- **Simplicity and Reliability:** Operates without electronic components, reducing the risk of breakdowns, maintenance needs, and costly repairs over time.
- **Certified Efficiency:** Achieves an amalgam separation rate of over 99%, meeting ISO standards and ensuring environmental compliance.
- **Versatility:** Ideal for clinics with 1-5 dental units, accommodating various operational needs and scaling effortlessly with clinic growth.
- **Minimal Maintenance:** Requires only an annual container replacement, with no complex technical interventions, providing peace of mind and uninterrupted service.

Technical Specifications Metasys ECO II PLUS Amalgam Separator 5 dental units:

- **Capacity:** Supports up to 5 dental units, making it versatile for different clinic sizes.
- **Separation System:** Fully electronic-free operation, reducing complexity and enhancing durability.

- **Separation Rate:** >99%, ensuring effective amalgam waste management.
- **Maintenance:** Annual container replacement required to maintain peak performance.
- **Compliance:** Fully meets ISO standards for amalgam separators, ensuring adherence to regulatory requirements.

The ECO II PLUS Amalgam Separator offers a practical and cost-effective choice for amalgam management, combining simplicity with high performance.

Choose the Metasys ECO II PLUS by Metasys from Tecnomed Italia and discover a new level of efficiency and reliability in amalgam separation systems for dental practices. Optimize your daily work with Metasys solutions and with the assurance and guarantee of Tecnomed Italia's after-sales service.
