Categories: Cart-Mounted Arms

Description

The monitor stand arm for the SOFT cart is a functional and elegant solution designed to **mount and support a medical monitor directly on the cart**, improving workflow efficiency and organization in dental and medical environments.

Engineered to support **monitors up to 24"**, it allows smooth and precise screen adjustment, ensuring optimal viewing of clinical images, radiographs, and digital content. The flexible positioning of the monitor enhances daily usability and supports **clear communication with the patient** during consultations and treatments.

By integrating the monitor onto the cart, the pantograph arm helps create a **fully mobile workstation**, ideal for use with **intraoral cameras, digital documentation systems, and clinical software**, meeting the practical needs of dentists and dental hygienists who require flexibility and ease of use.

With its clean, professional design, the pantograph arm fits seamlessly into modern clinical settings, optimizing space, reducing operational time, and improving the overall patient experience.

Key features monitor stand arm SOFT cart:

- Professional structure for **medical and dental applications**
- Supports monitors up to **24"**
- **VESA 75/100 mounting interface**
- **Dental white finish**, suitable for clinical environments

- Pantograph mechanism for smooth and ergonomic adjustment
