

N.1 ENDOVA tip for scaler, cavity finishing, Satelec – DTE compatible

Endodontic tip for Satelec, DTE, NSK ultrasonic units – Ideal for refining access cavity walls.

Available

SKU: PG01XS

Categories: Satelec - DTE - NSK

Description

Endodontic tip for scaler ENDOVA No. 1 compatible with Satelec-DTE.

Indicated for refining the walls of the access cavity during endodontic treatment, it is manufactured from stainless surgical steel to provide resistance, durability and superior performance.

Thanks to its fine profile and specific design, it is also suitable for complex situations, such as canals that are difficult to locate or calcified.

Autoclavable and ideal for continuous use, it retains its original shape for longer and significantly reduces wear caused by abrasion.

Compatible with the main scaler systems available on the market, it is designed to provide precision and control during endodontic procedures.

Key features Endodontic tip scaler ENDOVA No. 1 compatible Satelec-DTE

- application: refinement of the walls of the access cavity
- material: stainless surgical steel
- autoclavable
