

ENDOVA N.2 scaler tip, MB2 canal location, compatible Satelec DTE

Endodontic tip N2 for Satelec and DTE ultrasonic units – Engineered for locating the second mesiobuccal canal (MB2).

Available

SKU: PG02XS
Categories: Satelec - DTE - NSK

Description

ENDOVA No. 2 endodontic scaler tip compatible with Satelec-DTE.

Indicated for **locating the second mesiobuccal canal (MB2)** during endodontic treatments, it is made of surgical stainless steel to provide strength, durability and superior performance.

Thanks to its slender profile and specific design, it is also suitable for complex situations, such as canals that are difficult to locate or calcified.

Autoclavable and ideal for continuous use, it retains its original shape for longer and significantly reduces wear caused by abrasion.

Compatible with the main scalers available on the market, it represents a professional solution designed to ensure precision and control during endodontic procedures.

Key features of ENDOVA No. 2 endodontic scaler tip compatible with Satelec-DTE

- Application: locating the second mesiobuccal canal (MB2)
- Material: surgical stainless steel
- Autoclavable
