

N.2 ENDOVA tip for scaler, canal exploration, Satelec – DTE compatible

Endodontic tip N2 for Satelec and DTE ultrasonic units – Engineered for enhanced access and exploration of the second mesiobuccal canal.

Available

SKU: PG02XS

Categories: Satelec - DTE - NSK

Description

Endodontic tip for scaler ENDOVA No. 2 compatible with Satelec-DTE.

Indicated for exploration of the second mesiobuccal canal during endodontic treatment, it is manufactured from stainless surgical steel to provide resistance, durability and superior performance.

Thanks to its fine profile and specific design, it is also suitable for complex situations, such as canals that are difficult to locate or calcified.

Autoclavable and ideal for continuous use, it retains its original shape for longer and significantly reduces wear caused by abrasion.

Compatible with the main scaler systems available on the market, it is designed to provide precision and control during endodontic procedures.

Key features

Endodontic tip for scaler ENDOVA No. 2 compatible with Satelec-DTE

- application: exploration of the second mesiobuccal canal
- material: stainless surgical steel
- autoclavable
