

N.3 ENDOVA tip for scaler, canal opening, Satelec – DTE compatible

Endodontic tip for scaler ENDOVA No. 3 for Satelec and DTE ultrasonic units, for the enlargement of the canal orifice and the removal of fiber-reinforced intracanal posts, manufactured from stainless surgical steel and autoclavable.

Available

SKU: PG03XS

Categories: Satelec - DTE - NSK

Description

Endodontic tip for scaler ENDOVA No. 3 compatible with Satelec-DTE.

Indicated for opening the canal orifice and for the removal of fibre endodontic posts during endodontic treatment, it is manufactured from stainless surgical steel to provide resistance, durability and superior performance.

Thanks to its fine profile and specific design, it is also suitable for complex situations, such as canals that are difficult to locate or calcified.

Autoclavable and ideal for continuous use, it retains its original shape for longer and significantly reduces wear caused by abrasion.

Compatible with the main scaler systems available on the market, it is designed to provide precision and control during endodontic procedures.

Key features Endodontic tip for scaler ENDOVA No. 3 compatible with Satelec-DTE

- application: opening of the canal orifice and removal of fibre endodontic posts
- material: stainless surgical steel
- autoclavable
