Description

PC All-In-One touchscreen 21.5": computer equipment for viewing medical images must be advanced enough to display faithful graphics and realistic colours. Our touch screen PC with IEC 60601 medical class power supply are de-signed to meet a wide range of needs, and are especially suitable for displaying top quality images. This device is easy to install and – an indispensable prerequisite for any medical environment – easy to sanitise too. The most important characteristics of this all-in-one medical PC from Tecnomed Italia are its multimedia functionality and its touch screen interface.
