

Perio tip for scaler, compatible Satelec H2R, DTE P2RD, NSK P25R

Right-oriented tip for deep subgingival scaling and molar drilling.
Comp. Satelec H2R, DTE P2RD, NSK P25R

Available

SKU: PG106

Categories: Satelec - DTE - NSK

Description

Perio tip for ultrasonic scaler compatible with Satelec H2R, DTE P2RD, NSK P25R

This perio insert is designed for **periodontal treatments**, providing effective access to **deep periodontal pockets** and anatomically challenging areas.

Its **extremely slim structure** allows precise operation in confined spaces, facilitating **painless root surface debridement** and effective calculus removal even where interdental space is limited or in the presence of overlapping crowns.

The **minimal movement amplitude**, combined with **reduced vibration power**, significantly enhances **patient comfort** during treatment.

The **subgingival spray system** supports more effective removal of disrupted biofilm residues, improving cleanliness and visibility in the treated area.

The **right-oriented tip** is specifically indicated for **deep subgingival scaling** and for the treatment of **molar furcations**.

Compatibility. Perio ultrasonic scaler tip compatible with: **Satelec H2R, DTE P2RD, NSK P25R.**
