Description

Pneumatic veterinary dental cart Dentaway.

Our mobile veterinary dental units are easy to transport and can therefore be used in a number of different veterinary studios.

Their intelligent design guarantees unobstructed operations. Functions are controlled by simple and intuitive hand and foot controls. These units offer all the functions you need to provide effective veterinary dental treatments.

They are made from top quality materials for unrivalled robustness. The spray/water supply from the tank guarantees total operational autonomy. All you need to be up and running is a compressor connection.

The front panel houses the water/ spray regulator and a selector for the left or right hand instrument. In the lower part there is the water/ spray lever selector.

The trolley unit come with a progressive foot control. An increase in foot pressure gives an increase in instrument speed.
