Description

Prosthetic tip for scaler PG090.

The range Conservative & Prosthetics of Tecnomed Italia inserts is ideal for the microinvasive preparation of cavities and for decementation.

Our diamond conservative tips let you target lesions with great accuracy without damaging healthy tissue.

They are also excellent for removing carious dentine without damaging healthy adjacent teeth.

Our inserts for the decementation of implants and bridges are specially designed to help you work more rapidly and effectively.

Prosthetic tip for the alignment and removal of bridges, crowns and posts.
