SKU: AR705

Categories: Tabletop Scalers, Professional Equipment

Description

The D5 DTE-Woodpecker ultrasonic scaler is the ideal choice for dental professionals seeking a reliable device that can be easily connected to the water supply. Equipped with an intuitive control panel and an ergonomic handpiece, this scaler allows quick selection of Scaling, Endo, and Perio modes, providing maximum versatility for various clinical applications.

The D5 handpiece is designed to offer both comfort and precision during treatments. Its lightweight construction and ergonomic grip help reduce fatigue during extended procedures, while minimizing perceived vibrations, giving the dentist greater control and confidence. The handpiece is compatible with Satelec® tips and can be easily sterilized in an autoclave at 135°C, ensuring impeccable hygiene between treatments.

Among the key strengths of the D5 scaler is its ease of use. The control panel, powered by a microprocessor board, allows for quick function selection using the “OPTION” button, while the vibration intensity can be adjusted through the “+” and “-” symbols. A 10-level LED indicator displays the selected intensity, providing precise control during scaling. Water and spray flow can be easily regulated via a dedicated knob, ensuring the right amount of cooling at every stage of the treatment.

Included accessories:

- Control unit
- Handpiece compatible with Satelec® tips (M17S)
- 6 tips (2x GD1, GD4, GD2, PD1, ED1)
- 4 files
- Foot control pedal
- Torque wrench (K14E) and endodontic wrench (K14EN)
- Power supply

The D5 DTE-Woodpecker scaler combines performance, comfort, and precision, making it an essential tool for modern dental practices.
