

# Stainless steel washbasin cabinet,800X650X1020, with solenoid valve

**Available on request**

**SKU:** WASHCH-381
**Categories:** Sinks

## Description

The **surgical stainless-steel wash unit 800×650×1020 H** is designed for **hospitals, clinics and operating theatres** where hygiene and efficiency are essential.
Made entirely of **stainless steel**, it provides **robust construction, corrosion resistance and easy cleaning**.

The **welded flush-top bowl** creates a seamless surface that prevents dirt build-up and simplifies maintenance.
All corners are rounded and fully welded to enhance operator safety and ensure maximum hygiene.

A **foot-operated solenoid valve** allows **hands-free water control**, reducing the risk of cross-contamination.

An integrated **basket** provides convenient storage for cleaning accessories or consumables, keeping the workspace tidy.
Compact, reliable and easy to sanitise, this **surgical stainless-steel wash unit** delivers a **professional-grade solution** for healthcare facilities demanding ergonomic, hygienic and durable equipment.
