Available

SKU: DE2044

Categories: Professional Equipment

Description

The **UVC SMART Smartphone Steriliser** is a practical solution for sanitising smartphones and small everyday items quickly and efficiently. Designed for regular use at home, in the office or in professional environments, it combines a compact footprint with simple operation and a clean, modern look.

Using **UVC technology**, it helps sanitise frequently handled items such as smartphones, keys, face masks and personal accessories in just **10 minutes**. This makes it particularly suitable for day-to-day routines where convenience, hygiene and speed all matter.

The unit also offers added practicality thanks to its **5V 1A external USB charging port** and **internal USB port for smartphone charging**, making it a useful accessory for desks, counters and workstations.

Main features UVC smartphone steriliser
