Categories: Straight Handpieces

Description

Ivory Neo Line Straight Handpiece Blue Intramatic Coupling

The **Ivory Neo Line straight handpiece blue Intramatic connection** provides maximum flexibility, lightness and precision during clinical procedures. Designed for comfort and reliability, it ensures total control and long-lasting performance for professional use.

Superior flexibility and handling.

With its ergonomic design and perfectly balanced body, the handpiece adapts easily to any type of procedure. Its light weight and vibration-free operation reduce hand fatigue while maintaining excellent control and accuracy.

Efficient power transmission and quiet operation.

The mechanical transmission components are engineered with **extremely low tolerances**, ensuring optimal power transfer from the micromotor without energy loss or excessive noise. The result is a smooth, quiet and efficient working experience.

Long-lasting quality and compatibility.

Built from high-quality materials, this handpiece offers strength, durability and consistent performance over time. The Intramatic connection ensures full compatibility with standard dental micromotor systems.

Technical features Straight blue Ivory Neo Line Intramatic coupling

Type of Spray	Internal
Optical fiber	No
Connection	Intramatic Universal
Transmission	1:1
Drill Diameter	2,344/2,350 mm
Drill length	21,95/44,50 mm
Weight	93 gr.
Maximum rotation per minute	40.000 rpm
Type of Lubrication	Oil
