Available

SKU: ANR177-O

Categories: Veterinary Handpieces

Description

The **VetLine blue 1:1 straight handpiece for veterinary use** is a rotary instrument designed to support veterinary dentistry procedures in veterinary practices and clinics.

With a **1:1 transmission ratio**, it provides stable and controlled rotation, with a maximum speed of **20,000 rpm**. It is suitable for use with compatible micromotors equipped with **ISO standard / E-Type connection** and external spray system.

Compact, robust and easy to handle, this straight handpiece is a practical solution for integrating veterinary dental procedures into Tecnomed workstations and compatible veterinary dental units.
