Tecnomed Digiclean stainless steel ultrasound tank, 3 l capacity, digital timer, with lid

Available on request

SKU: CLEA3L

Categories: Ultrasonic cleaners

Description

Ultrasonic cleaner Digiclean 3l

The Ultrasonic washing is the most technologically advanced and cost-effective means of cleaning.

Ultrasonic cleaner Digiclean 3l generate an high ultrasonic power that associated with a disinfectant cleanser will ensure you a quick and effective cleaning action by removing dirt even in the hard- to-access parts.

Made of non-scratch stainless steel, it proves resistant over time against wear-and-tear corrosive agents.

An electronic generator operated by a microprocessor optimizes power performance while a display control panel allows the setting and the viewing of vibration times and liquid temperature values.

- An Intuitive control panel lets you set cleaning time (from 1 to 99 minuts), solution temperature (0°C to 80°C) and ultrasonic frequency.
- Our ultrasonic cleaners are made entirely from stainless steel for maximum durability.
- A new feature of this range of cleaners is the availability of Pyrex beakers (optional) for indirect cleaning with particularly aggressive solutions.
