Description

OKKIO USB medical camera 4K 25mm F8.0 650/750mm is the new smart camera developed to offer an unprecedented experience in medical-dental field documentation and communications.

Exceptional quality from the palm of your hand – OKKIO camera acquires and shares high quality 4K (3840x2160 pixels) pictures and videos.

Don't let its small size deceive you – The OKKIO camera features a powerful Sony IMX415 sensor, guaranteeing exceptional image quality and fast, accurate autofocus, making recording and documentation much easier than ever before, acquisition software included.

Put it wherever you want – Thanks to its size and lightness and multiple installation options, OKKIO Camera can be easily mounted over a dental unit lamp.

Ease to use – You don't need to be a technology, filming or editing expert. This camera is designed to do it all with great simplicity, making your life much easier. The photos and videos can easily be saved, reviewed and shared at any time. Forwarding reports to colleagues for comparison or showing the patient the “before and after” will be a piece of cake.
