Description

HW-6L LED Woodpecker scaler handpiece compatible with EMS
The HW-6L LED Woodpecker scaler handpiece compatible with EMS is designed to deliver reliable and consistent performance, providing professionals with a high-quality piezoelectric tool.

Built with durable materials, it is fully autoclavable and retains its integrity even after multiple sterilisation cycles, resisting cracks and deformations. The integrated LED light ensures excellent visibility during procedures, enhancing operational precision.

Its lightweight and ergonomic design allows extended use without hand fatigue, making it an ideal choice for dental practices that value comfort and reliability in everyday treatments.

Fully compatible with EMS connection systems and Sine Wave Drive technology, this handpiece guarantees versatility and wide availability of tips, offering dentists greater flexibility and clinical reliability.
