

Woodpecker U6 LED ultrasonic scaler,EMS compatible

Woodpecker benchtop power scaling unit, LED, handpiece and EMS compatible tips

Available

SKU: AR602FO

Categories: Tabletop Scalers, Professional Equipment

Description

The **Woodpecker U6 LED ultrasonic scaler** represents the latest advancement in ultrasonic scaling, offering superior comfort and performance for a wide range of dental treatments.

This ultrasonic scaler is ideal for supragingival and subgingival scaling, as well as endodontic treatments, ensuring precise and reliable results. Thanks to the microcomputer control and automatic frequency tracking function, it maintains stable performance even during the most demanding procedures.

Key Features and Advantages Woodpecker U6 LED:

- **NO PAIN Technology:** Sine-wave technology ensures a smooth power output, offering a comfort level comparable to high-end devices.
- **Smart touch system:** The intuitive touch control system simplifies operation, ensuring a seamless user experience.
- **Root canal treatments:** With optimized tip vibration and intelligent negative feedback, it provides a more comfortable experience during root canal procedures.
- **High-quality materials:** The water system uses anti-rotation materials, allowing for the application of all clinical solutions, while the new handpiece sealing technique ensures smooth and stable power output.
- **Sensitive and waterproof touch screen:** The waterproof touch screen can be protected with a film to prevent cross-infection, ensuring a safe and hygienic environment.

Ideal for: The Woodpecker U6 LED is particularly suited for dentists and dental specialists seeking a versatile, high-performance device for ultrasonic scaling, endodontic treatments, root canal therapy, periodontal procedures, plaque removal, and complex dental hygiene tasks. It is especially beneficial in clinics focused on providing exceptional patient care with minimal discomfort and precise results.

Choose U6 led scaler by Woodpecker from Tecnomed Italia and discover a new level of efficiency and reliability in various dental treatments. Optimize your daily work with DTE-Woodpecker solutions, with the assurance and guarantee of Tecnomed Italia's after-sales service.

Technical Specifications Woodpecker U6 LED ultrasonic scaler:

- Main unit input: 24V, 50Hz
- Water pressure: 0.01MPa – 0.5MPa
- Frequency: 28KHz + 3KHz
- Main unit weight: 628g
- Dimensions: 175 x 144 x 77mm
