Description

Woodpecker UDS-E LED ultrasonic scaler, EMS Compatible with Tank

The UDS-E LED Woodpecker scaler is a versatile and innovative solution for dental professionals, offering high performance with EMS compatibility and the flexibility of a built-in water tank for easy placement anywhere in the clinic.

Equipped with an intuitive control panel and an ergonomic handpiece featuring 6,000 LUX LED illumination, this device allows you to effortlessly switch between Scaling, Endo, and Perio modes while ensuring optimal visibility of the working area. Its compatibility with EMS® tips and the freedom from waterline connections make the UDS-E LED highly adaptable and simple to install in any treatment room.

Key Features and Strengths:

- **Clinical Versatility:** Compatible with a wide range of EMS® tips for various clinical applications.
- **Flexible Placement:** The built-in water tank eliminates the need for waterline connections, allowing flexible placement within the clinic.
- **Ergonomic Handpiece with LED:** The lightweight, compact handpiece equipped with LED illumination provides clear, detailed visibility of the treatment area, improving procedural efficiency.
- **User-Friendly Control Panel:** Easy to operate, it allows mode selection and vibration intensity adjustments through clear symbols and a 10-level LED display.

Indications for Use: The UDS-E LED is ideal for dental practitioners requiring a versatile, ergonomic, and easy-to-use tool for scaling, periodontics, and endodontics. It is particularly suitable for professionals seeking a device with flexible placement options and high convenience.
