LUBRICANT OIL

The lvory range of lubricants is universally recognised for its unrivalled degreasing and cleaning power. The elimination of overheating in moving parts, the prevention of deposits, lower consumption and running costs, extended instrument life, zero thermal stress and oxidation, better performance and fewer technical assistance callouts are just some of the benefits of using these oils.

FAST-OIL, THE NEW FRONT LUBRICATION SYSTEM

The innovative front lubrication system **Fast-Oil** designed and developed by lvory for Silk Line instruments represents one of the most important developments on the market today. Thanks to this clever design, you can spray-lubricate the turbines of Silk Line instruments from the front, without any need for adapters. This is possible thanks to a revolutionary lubricant distribution system inside the rotor. The result is significantly reduced repair costs, less chance of mistakes when servicing the instrument and reduced maintenance times too.

Adapter for turbines and micromotors REF. CL5.001V

Adapter for contra-angles and heads REF. LIV1013

Vory at dark ihres unübertreflichen Entlettungs und Rendung gewogen, keine Überhitzung von Bewegungsteilen, weise ihr eine son gerögene Verbrauch, geringene Ausgabet, beseine Sonale und der Didationsbelastung, hohe Leistung, gemein Ausei Ausgebert um nur einige der Vortele des Ols hory zu nervel.
